## Overview

**Wordsmith is a flip-and-write game that adds "Ganz Schon Clever"-like combos to a word game.**

Your aim is not just to form words, but to form them in specific positions in your board that will allow you to forge items.

Each type of item has a different bonus, that you'll use to combo-off on your turn, making more words and forging more items.

## Game highlights

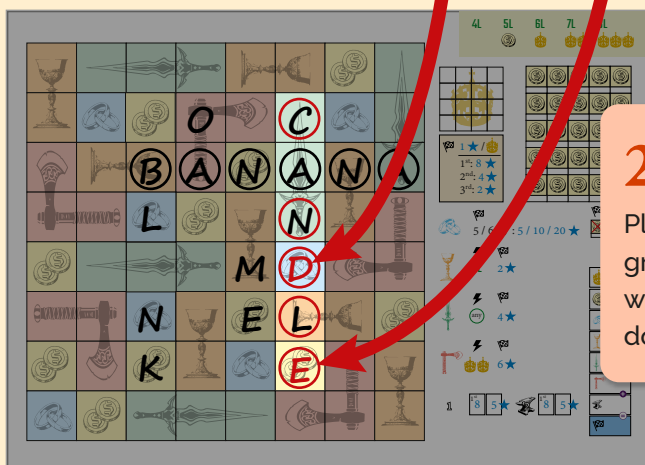

- **Simultaneous play:** players choose letters at the same time, lowering the downtime.
- **One more layer of strategy:** forming words is not enough. You must think where to place them, to be able to use the powerful bonuses of the items.
- **Goals:** each game, you reveal 2 cards with big items, like the chandelier and the armor: patterns that players must make with their circled letters to score more points.

## Components

- 55 cards
- 1 strip
- pad with multiple sheets

1

Buy any 2 letters from the strip (all players at the same time)

2

Place them in your grid trying to form words. Once you do, circle its letters

3

When you circle all the letters of an item, you forge it: score points and gain combo-tastic bonuses

= gain 2

= 2 ★ + write a letter anywhere

= 4 ★ + circle any square
