Overview

Ice Cave is a tile-laying auto-battler (or auto-tile-layer?).

Each round, you'll make an expedition to an ice cave: Blindly grab tiles from the bag one by one, placing each adjacent to the last.

Cleverly place the tiles to score crystals, defeat the troll and be able to get better tiles for next round.

Game highlights

- **Auto-battler with more control:** you can spend a compass to draw another tile, and you choose where to place it.
- **Simultaneous play:** players grab tiles at the same time, comparing at the end of the round.
- **Many strategies in a small framework:** Tiles you take drastically change how you'll play each game.

Components

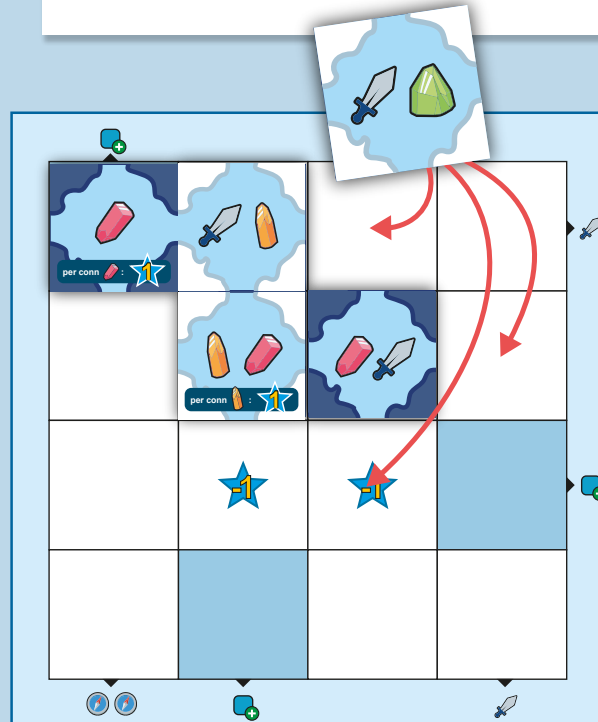

- 107 tiles
- 5 player boards
- 1 small main board
- 36 tokens
- 5 cloth bags

3-min video

<https://youtu.be/WlplO6RJMZw>

- 1 Grab tiles from your bag one by one, place them on your board, always adjacent to the last one

Spend a compass to grab another tile and choose which to place

Connected swords help fighting the troll

Connected crystals of the same type score

Tiles with dark borders are unstable. 2 adjacent ones will flip.

- 2 See if you defeated the troll and avoided its penalty.

- 3 Compare your scoring to other players to gain trophies.

- 4 Take a new tile for your bag depending on how many blue spots you filled in your cave.
