

In Wok On, players will use strings to enclose areas of a big string wok, trying to reserve the best ingredients and spices for their meal.

Components and setup:

1. Wok string

Open it in the center of the table making a circle (doesn't need to be perfect - imperfections are encouraged).

2. 60 ingredient cubes (15 mushroom, 15 broccoli, 15 corn, 15 pork loin) & 16 spice discs (4 per ingredient)

Spread them along the whole wok, including near the borders.

Make sure there are no big concentrations of bits and no large areas without any.

3. 36 strings

For 2 / 3 / 4 players, give each 18 / 12 / 9.

4. 72 large discs (18 in each color)

For 2 / 3 / 4 players, give each 18 / 12 / 9 of one color.

5. 4 player aid cards (one per player)

The player with highest tolerance to spice starts.

Your turn:

1. Take one of your strings and connect it either to the border of the wok or to another string, trying to enclose ingredients and spices.
2. Take care not to move the bits inside the wok.
3. The area you enclose CANNOT have more than 5 ingredients. If it does, you can't place your string.
4. Take all the ingredients from the area you enclosed. You can group the cubes and spices of the same type.
5. Place one of your player discs on the area of the wok you just enclosed.

Wok with the ingredients nicely spread.

Player setup in a 3-player game: 12 strings and 12 player discs of one color.

Orange player enclosed an area with a mushroom (pink cube), a pork loin (brown cube) and a spice with a pork loin symbol in it. They group their cubes and spices of the same type.

Then, they place their orange disc inside the enclosed area.

Game end:

The game may end in two ways:

- A. When all players place all their strings.
- B. If the ingredients in the wok run out.

When that happens, the game ends immediately.

Now players calculate their scores:

- Each set of 4 ≠ ingredient cubes: **5 points**
- For each ingredient, multiply the number of cubes for the number of spice discs
- Each connected disc in of your color in in its largest set: **2 points**
- Each disc still on their hand: **2 points**

Whoever has more points is the winner. If there's a tie, the tied players share the victory.

Simple version:

To play a simpler, but equally challenging version of the game, do the following:

Components and setup:

You won't need the 72 large discs or the player aids. Leave them in the box.

Take the player shields and give one per player.

The rest of the setup proceeds as in the regular game.

Your turn:

The turn works the same way as in the regular game, but you don't place discs in the areas you enclosed. Place the ingredients you took behind your shield so no one except you knows how many you got of each.

Game end:

The game ends in the same way as in the regular game. The scoring is simplified though:

All players reveal the ingredients they got.

The player with most of each ingredient gains 1 point. If two players are tied, neither gets the point.

Instead of multiplying the other ingredients, spices count as an independent one. Whoever has most spices also scores 1 point. The color of the spice doesn't matter.

Finally, the player with the most complete sets of the 5 ingredients also scores 1 point. Like for other ingredients, if players are tied for most complete sets, neither scores.

Whoever has more points wins. In case of a tie, whoever has more ingredients in total wins. If the tie persists, players share the victory.

Orange scoring:

- 2 sets of 4 ingredient cubes (pink, yellow, green, brown) = 10
- 2 mushrooms (pink) x 1 spice (red) = 2
- 5 corn (yellow) x 3 spice (red) = 15
- 4 broccoli (green) x 0 spice (red) = 0
- 8 pork loin (brown) x 2 spice (red) = 16
- 6 connected discs (orange) in largest set = 12
- 1 disc (orange) still in hand = 2
- **Total = 57 points**

Player A

Player B

Scoring the simple game:

- Player A has more corn (5) and pork loin (8). They score 2 points
- Player B has more mushrooms (4), and more complete sets (2). They also score 2 points.
- No one has the majority on broccoli and on spices, so no one scores
- Since there's a tie, Player A wins (25 against 24)
